

DALLAS BOHANAN

Maple Heights, Ohio | 253-397-7018|
DallasBohananproac@gmail.com

Professional Summary

Networking and technology enthusiast. Aspiring Network Engineer with strong networking fundamentals in routing, switching, network security, wireless, and networking architectures. Strong passion for building, problem-solving, and securing end to end networks. Experience in user lifecycle management, access control systems, IT collaboration, and cross coordination in structured zero-trust environments.

Certs/education

Cisco Certified Network Associate
Highline College - Associates

Projects (Packet Tracer)

Enterprise Simulated Network

Designed and continuously expanded a multi-site enterprise network featuring 11 VLANs with full VLSM subnetting, dual-home internet paths, multilayer switching with SVIs, OSPF multi-area routing with EBGp at the edge, HSRP gateway redundancy, STP/RSTP tuning, standard and extended ACLs, and NAT/PAT. Troubleshot real convergence and failover scenarios throughout the build. **(Available to view on projects website)**

Related Experience

GM Cruise | Bellevue WA

Dec 2019 – Feb 2024

- Administered employee access databases for physical access: created profiles, issued credentials, managed permissions, and tracked system access in a zero-trust facility for over 500+ employees
- Coordinated with CBRE facilities management and IT teams for routine maintenance and system repairs
- Logged and tracked maintenance requests through ticketing workflows (Jira); coordinated with vendors and IT for system repairs

Safeway Distribution Center | Bellevue WA

April 2024 – November 2024

- Managed user lifecycle for 500+ employee badge access profiles — created, modified, and deactivated accounts for onboarding and offboarding using access control software.
- Troubleshot badge access failures; resolved issues independently or escalated to IT with clear documentation of the problem and steps taken

BitRepair | Parama, OH

Dec 2024 – March 2025

- Built and repaired Bit Coin miners
- Replaced CPUs, GPUs, Mother Boards
- Racked and stacked miners for testing
- Helped manage inventory
- Prepared order shipments for clients

Skills

VLANs, Trunking (802.1Q), Inter-VLAN Routing, OSPF (multi-area), EIGRP, Static & Floating Routes, HSRP, STP/RSTP/PVST, ACLs, NAT/PAT, IPv4/IPv6, VLSM, DHCP, NTP, DNS, WLAN and LAN Architectures, Network Automation, Wireless Configuration and Architectures,
